Flexible Scope

The laboratory is accredited to ISO/IEC 17065:2012 for product certification activities in accordance with the standards included on this schedule. This may also include certifications on the same or similar product types against standards, or customer-specified methods, that are not specifically listed in this Schedule, providing that:

- (1) The method or standard does not introduce new principles of testing / measurement.
- (2) The method or standard does not require testing / measurements to be made outside the parametric boundaries defined within the standard specifications already accredited and detailed within this Schedule of Accreditation.

Information about flexible scopes of accreditation is available on the UKAS website.
